Themes and Methods in the History of Technology

TECHNOLOGICAL CULTURES

Themes and Methods in the History of Technology

Workshop Discussion Series, 2010

A series of workshop discussions to be held at the Max Planck Institute for the History of Science, Berlin, throughout the year 2010, will explore the potential of emerging approaches on “technology” and “technological cultures” to generate productive new themes and methods. Invited participants will give informal presentations of their work as a point of entry into a broader debate. All events take place at the conference room of the MPIWG, 3–5 pm. Registered guests are welcome.
