The MPIWG Institute's Colloquium 2024–25 is open to all. Scan the QR code to go to the Institute's Colloquium Overview Page. Registration details are listed on the individual event pages.

About the Institute's Colloquium 2024–25

This colloquium series features scholars who have successfully brought their scholarship into the public sphere, often in creative, unexpected, and challenging ways. We invite them to share their findings, experiences, and methods, and to tell us how their engagement with non-academic publics has (or, perhaps, has not) changed the way they approach their research.
