- Introduction: Genetic Claims and the Unsettled Past 1  
KEITH WAILOO, ALONDRA NELSON, AND  
CATHERINE LEE

## PART ONE

### History, Race, and the Genome Era

- 1 Who Am I? Genes and the Problem of Historical Identity 13  
KEITH WAILOO
- 2 Reconciliation Projects: From Kinship to Justice 20  
ALONDRA NELSON
- 3 The Unspoken Significance of Gender in Constructing Kinship,  
Race, and Nation 32  
CATHERINE LEE

## PART TWO

### Decoding the Genomic Age

- 4 A Biologist's Perspective on DNA and Race in the  
Genomics Era 43  
ABRAM GABRIEL
- 5 The Dilemma of Classification: The Past in the Present 67  
LUNDY BRAUN AND EVELYNN HAMMONDS
- 6 The Informationalization of Race: Communication,  
Databases, and the Digital Coding of the Genome 81  
PETER A. CHOW-WHITE

**ACKNOWLEDGMENTS**

Drawn together by a common interest in race, history, and science, the editors of this volume—Keith Walcott, Alondra Nelson, and Catherine Lee—along with Mia Bay, organized a conference on “Race, DNA, and History” in late 2007. Submissions for the conference came in from scholars across many disciplines, indicating the way in which questions concerning the genetic view of race spanned across fields in the humanities, social sciences, the sciences, and the professions. The essays in this collection were among the most compelling papers in the conference, and a subsequent meeting of the authors transformed the often-disparate questions of race, genes, and history across law, medicine, culture, and society into one multidimensional conversation. This book is the product of these rich conversations tracking the unfolding problems of genes and identity. We must first thank Mia Bay for her contributions toward the conceptualization and organization of the conference. Helpful as well were the contributions of Eilat Zerubavel, Nadia Abu El-Naj, Julie Livingston, Stephen Pemberton, Ann Jurcic, and Scott Guba. The logistical challenge of the conference and planning the volume were deftly handled by Mia Khalil, the senior program coordinator at Rutgers Center for Race and Ethnicity. We could not have held the conference nor put together this volume without the financial support of the Center for Race and Ethnicity and Rutgers University more generally. The center also provided sustained commentary, insight, and organizational energy of the graduate research assistants over many years who offered incisive comments and administrative support. They are: Jill Campalola, Elizabeth Reich, Simone Deferme, Scott Thomas, Anantha Sudhakar, Jeffrey Dowd, Greg Vargha, Bridger Carter, Fatimah Williams-Castro, Melissa Stein, Stephanie Jones-Rogers, Fred Harris, Iwa Ali, Nadia Brown, Dana Brown, and finally, Shuchi Jainani, who offered extraordinary editorial insight at multiple stages of this project. We are also grateful for the helpful evaluations of two anonymous reviewers for their critical questions and trenchant comments. We also wish to thank the Russell Sage Foundation, the James S. McDonnell Foundation (Confidential Fellowship in the History of Science), Yale University, Columbia University, Rutgers University, colleagues in the Rutgers History Department and Sociology Department, and the Institute for Health, Health Care Policy, and Aging Research for many years of
