

# Contents

<b>1 The Challenge of a Historical Epistemology of Space</b> . . . . .	1
References . . . . .	7
<b>2 Natural Conditions of Spatial Cognition</b> . . . . .	9
The Object of Study . . . . .	9
Example: Object Permanence . . . . .	10
Example: Cognitive Mapping . . . . .	13
The Character of Spatial Knowledge . . . . .	15
References . . . . .	19
<b>3 Culturally Shared Mental Models of Space</b> . . . . .	21
The Object of Study . . . . .	21
Example: The Eipo's Network of Toponyms and Spatial Reference . . . . .	24
Example: The Absolute-Directional System of the Caroline Island Navigators . . . . .	25
The Character of Spatial Knowledge . . . . .	28
References . . . . .	30
<b>4 Social Control of Space and Metrization</b> . . . . .	33
The Object of Study . . . . .	33
Example: Field Measurement and the Metrization of Space in Ancient Mesopotamia . . . . .	36
The Character of Spatial Knowledge . . . . .	39
References . . . . .	40
<b>5 Reflection and the Context-Independence of Mental Models of Space</b> . . . . .	43
The Object of Study . . . . .	43
Example: Deductive Geometry . . . . .	46
Example: Theories of Space . . . . .	51
The Character of Spatial Knowledge . . . . .	60
References . . . . .	61

<b>6</b>	<b>The Expansion of Experiential Spaces Over History</b> . . . . .	65
	The Object of Study. . . . .	65
	Example: The Development of Global Coordinates for Geographical Space. . . . .	67
	Example: Independence of Space from Matter and Force . . . . .	70
	Example: The Force Field as a Hybrid Between Objects and Space . . .	78
	The Character of Spatial Knowledge . . . . .	83
	References . . . . .	85
<b>7</b>	<b>The Decline of an Autonomous Concept of Space</b> . . . . .	89
	The Object of Study. . . . .	89
	Example: Four-Dimensionality of Spacetime . . . . .	92
	Example: Dynamicity of Spacetime . . . . .	96
	The Character of Spatial Knowledge . . . . .	101
	References . . . . .	103
<b>8</b>	<b>Concluding Remarks</b> . . . . .	107
	<b>Index</b> . . . . .	113
